

WEIGHT ROOM EQUIPMENT REPAIR

With our years of experience in weight room equipment, we have found that a yearly maintenance program (a little each year) is simply the most cost effective approach to having a weight room that athletics want to be in. We visually inspect all equipment for the initial quote to determine exactly what is needed for each piece. A majority of our work is the recovering of the existing vinyl material.

Weight room upholstery will be finished in 18 oz (**Your Choice of Color**) vinyl. Foam will be refreshed where needed and hardware added where needed. If boards are not serviceable, they will be replaced.
